“Geophysics at the Beach: Field Demo”

**May 26, 2010 • Peninsula Park
100 Main Street, Newport Beach, CA
(Bus will depart from hotel by 8:30 am - return to hotel around 2:30 pm)**

FIELD DEMO AGENDA

(as of 5/10/10)

Please join us for a day of Geophysics at the Beach. We have several vendors lined up to demonstrate the latest in geophysical field equipment in the beautiful sea-side setting of Peninsula Park in Newport Beach. The field demos will include Multi-Channel Analysis of Surface Waves (MASW), state of the art borehole logging equipment, Controlled Source Audio Frequency Magnetotellurics (CSAMT), and Time Domain Electromagnetic Induction (TEM), including a new very portable system just becoming available in the US.

The format will include a 30 to 45 minute presentation from each vendor with opportunities to see and operate the equipment, and the option of wandering between vendors at your discretion during the day. Box lunches and beverages will be provided.

The agenda is still growing, but as of May 10, the tentative agenda is as follows:

9:30 am – 10:15 am	Geometrics
10:30 am – 11:15 am	Geometrics
11:30 am – 12: 15 pm	ALPHA Geosciences
12:30 pm – 1:15 pm	Schlumberger Logging Services
1:15 pm – 2:00 pm	NORCAL Geophysical Consultants, Inc.
